IOTA R3800F Fasting curing silazane adhesive

Product characteristics: Room temperature curing, short curing time, excellent temperature resistance, temperature resistance 600-800°C

Product description: Three-components silazane ceramic precursor adhesive.

Application: Be used for on-site rapid processing, for example rapid sealing for metal parts and rapid repairing for composite material parts.

Packing: 0.5L~10L plastic drum or customized according to customer requirements

Technical index:

Appearance: white, no solvent

Viscosity: ~3000cp

Performance index:

Tensile shear strength at room temperature >1MPa

Tensile shear strength at 400°C >1MPa

Curing conditions: operating time 5~7 minutes, curing process: room temperature curing for 1 hour

Storage: The shelf life of curing agent is 1 year; After the curing agent is unsealed, its validity is affected by the protection measures, the validity is about 6 months at dry and low temperature condition. It should be stored in a cool and dry place.

Note: The base glue is placed for a long time, and ammonia gas will overflow when the cap is opened. It is best to use it in a ventilated environment.
