IOTA R31800 high temperature resistant putty

Product characteristics: Curing at room temperature, curing 5-7 days, be used for sealing the gap between composite materials, metals, ceramics with a certain elasticity.

Product description: The product contains a certain solvent and the solid content is >50%. The product is a three-component silicone polymer.

Application: Be used to seal the gap between composite materials, metals and ceramics.

Packing: 0.5L~10L plastic drum or customized according to customer requirements

Technical index:

Appearance: black, with solvent

Viscosity: 1000~3000cp

Performance index:

Oxyacetylene flame, 1800°C, time > 5 minutes

Curing conditions: room temperature curing 5-7 days.

Storage: The sealant should be stored in a cool and dry place with a shelf life of 1 year.

Note: The sealant contains a certain amount of solvent, it is best to operate in a ventilated environment.
